

# Image Conductive Water Detection Kits

**CBL-128**

**CBL-238**

## **PRODUCT OVERVIEW:**

Sequence offers two conductive water detection cables providing an inexpensive solution for water detection with Image controllers.

CBL-238 provides conductive water detection to IMC-237 and IMC-263.

CBL-128 can be added to ITW-209 to provide a combination of capacitive and conductive water detection.

Both CBLs can be matched with hardware to meet customer-specific installation requirements.

## **FEATURES / BENEFITS**

- Low cost water detection
- Multiple level water detect when used with ITW-209
- Ideal to trigger dry cycles after shower
- Includes pre-packaged hardware with stainless steel screws

## **OPTIONS**

- A variety of hardware is available to meet customer-specific installation requirements
