

IMC-266

Image Three Speed Pump Controller

PRODUCT OVERVIEW:

The IMC-266 module is the Image system three speed pump control. It also accommodates white and color LED lights, water temperature measurement and water level detection.

FEATURES / BENEFITS

- On/off control for three speed loads
- Diagnostics through bi-directional communication with the smart display
- Infrared communication with other Image control modules reduces cable requirements
- Two IMC-266 can be placed side by side with other Image modules to create custom configurations
- Mini-DIN connection for conductive and capacitive water level detection and temperature sensing using ITW-209
- Mini-DIN connection for up to 2 white lights (IWL-217) or up to 4 color lights (ICL-239/244)
- Mini-DIN connection for Image family displays
- Printed circuit board is conformal coated for protection against corrosion
- Physical box dimensions approximately: 6.80" x 6.80 x 2.75 (172mm x 172mm x 70mm)

CONFIGURATIONS

Part Number	Description
IMC-266-01-01-01	Image 3 Speed Pump Controller 120V Hardwire/Hardwire
IMC-266-04-01-01	Image 3 Speed Pump Controller 220V Hardwire/Hardwire
