

# ITW-209

Image Temperature and Water Detector with 6-conductor communication cable

## PRODUCT OVERVIEW:

The ITW-209-01-01-01 detects the presence and measures the temperature of the bath water. The communication cable connects the ITW-209 to Image controllers through a mini-din connection. Data is displayed on a compatible Image display.

## FEATURES / BENEFITS

- Compatible with Image controllers IMC-213 and ISD-237
- Supports both water level and temperature measurements
- Reads water temperature and level through tub wall
- Power indicator LED
- Capacitive water detect with conductive water detect capabilities
- Installed to the exterior surface of the wall tub with no holes or special fittings required
- Only one system connection cable required
- Manufacturer calibrated
- Physical box dimensions approximately 3.70" x 0.37" x 2.20" (9.4 x 0.94 x 5.6 cm)
- Printed circuit board is conformal coated for protection against corrosion
- US Patent No. 6,847,291
